Accountants & Business Advisers

VAT and Customs Duty Services

Our VAT and Customs team is hugely experienced in VAT and International Trade.

Maximise your **potential**

Our team of VAT experts have over 95 years of collective technical and practical knowledge gathered from prior HMRC employment and commercial experience, which can provide you with certainty.

We work with businesses of different sizes and in numerous industry sectors helping to reduce tax risks, improve compliance and support your business in future growth.

Our VAT and Customs review is tailored to your business

- Check the VAT liability of all income streams including grants and sales to overseas customers.
- If you have VAT exempt income, explain how partial exemption works.
- Consider whether recent changes to UK VAT including e-books, reverse charge construction services and MTD, impact upon your business.
- Review any other complex VAT issues including existing business models and corporate structures.

If you buy or sell goods to or from the EU or the Rest of the World

- Consider whether it is beneficial or necessary to register for VAT in the EU.
- Review your import and export procedures including tariff classification, customs valuation and Postponed Accounting for Import VAT.
- Discuss the VAT/Customs options if you sell goods to private consumers in the EU, including the EU OSS system.
